## Top Young Economists, as of February 2009

This page shows one of the many rankings computed with RePEc data. They are based on data about authors who have registered with the [RePEc Author Service](#), institutions listed on [EDIRC](#), bibliographic data collected by [RePEc](#), citation analysis performed by [CitEc](#) and popularity data compiled by [LogEc](#). To find more rankings, historical data and detailed methodology, click [here](#). Or see the [ranking FAQ](#).

These rankings consider only the youngest economists registered with RePEc. Young is defined by the year of the first publication in any form. [5 years or less](#), [10 years or less](#)

100. 99.83 2005 [Karin Hoisl](#)

The data presented here is experimental. It is based on a limited sample of the research output in Economics and Finance. Only material catalogued in [RePEc](#) is considered. For any citation based criterion, only works that could be parsed by the [CitEc project](#) are considered. For any ranking of people, only those registered with the [RePEc Author Service](#) can be taken into account. And for rankings of institutions, only those listed in [EDIRC](#) and claimed as affiliation by the respective, registered authors can be measured. Thus, this list is by no means based on a complete sample. You can help making this more comprehensive by encouraging more publications to be listed ([instructions](#)) and more authors to register ([form](#)). For more details on the various rankings that are available as well for documentation, follow this [link](#).
